

Passport 37

37'

When over 8,000 man hours go into the construction of a 37-foot yacht, you expect something special. And special is what you get with the Passport 37, from her custom-stem fitting and massive bow roller to her carefully contoured cockpit, which provides exceptional comfort and security.

Borrowing many of her attributes from her larger sister, the popular Passport 40, the 37 delivers style and performance in a slightly smaller package. The 37 is quick and stable, with an interior spaciousness rarely found in a yacht of this size. The uncluttered deck arrangement is designed so she can be handled by one or two with astounding ease. A single-line reefing system is available that allows

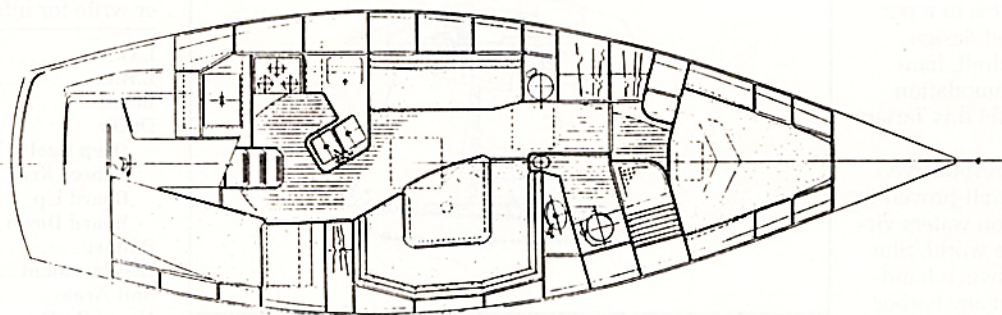

all of the sailing functions to be handled from the cockpit, where you will find all self-tailing winches.

Several standard interior layouts are available as well as the individual customizing for which Passport has become famous. Only the finest of materials and components are used throughout. The Passport tradition of attention to detail and exceptional finish work is evident everywhere you look from the solid-wood furniture-grade interior to the large sail locker.

Designer Robert Perry best sums up what makes every Passport special: "Passports are some of my most popular designs due to quality workmanship, superior handling performance, and a competitive price—a combination that's hard to beat."

L.O.A. 37' 0"
L.W.L. 29' 8"
Beam. 11' 11"
