

# Precision 21

21'

**T**he great care that both designer and builder have put into the development of the Precision 21 is most clearly reflected in her interior. Her main-cabin settee/quarterberths are both well over 7 feet long, and they are laid out properly fore and aft. The head can be accessed without having to wake any children sleeping forward, and there is storage for toilettries under this same hinged cushion.

The galley features a tip-out trash bin under the stainless steel sink, an alcohol stove, a storage bin for flatware and utensils, and a rack for wine and glasses. A 48-quart cooler securely stowed at the companionway is standard equipment, and there are two large, dry storage areas aft, both accessible from inside the cabin. There is a large cockpit locker to starboard, and the centerboard pendant tube is protected by being fully enclosed

inside the molded companionway step.

The cockpit of the Precision 21 is over 7 feet long and features seats and coamings precisely angled for comfort both when upright and when heeled. The inboard chainplates not only allow exceptionally close-winded performance to weather, but they leave the ample side decks clear, providing unobstructed passage past the sleekly styled cabinhouse to the anchor locker forward.
