

Precision 23

23'

Lively performance, reliable handling, and high stability are the hallmarks of the Precision 23. She features a racer-sharp waterline entry, substantial flare in the topsides forward, and powerful quarters that taper to a shapely and small transom.

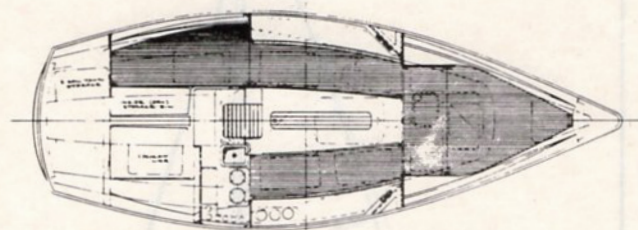

The Precision 23's bright and uncluttered interior includes a large companionway, cabin windows, and a forward hatch. The double berth forward is enormous, and aft there are full-sized berths for three. A portable head is forward, and the permanent galley is aft, convenient to both cabin and cockpit.

The long, shallow keel, kick-up rudder, and fiberglass centerboard are all highlift NACA wing sections. The board itself does not form a major portion of the total ballast, so that stability is not dangerously reduced when it is retracted.

The cockpit is 7'3" long, with a fuel-tank storage bin to port, a large cockpit locker to starboard, and an anchor locker on the foredeck.
