You may already be aware that Rebel Sailboats are quite the celebrities among the 14' to 16' fiberglass sailers. Two Rebel-built models are so popular, they each enjoy their own national sailing class!

Rebel designs are based on the engineering creativity of Ray Greene, whose fiberglass boat concepts were introduced in 1937 — ten years before the first fiberglass boats were suc-

cessfully marketed. Greene had a natural sense of what was important in sailboat design and, traditionally, people have chosen Rebel Sailboats for swiftness, reliability and affordability. That's why many of our earlier models are still being sailed by families and serious racers alike.

Today, we continue to build Rebel Sailboats using rigid quality control standards. Your safety is a constant

priority, and low maintenance and high strength are important design elements. Many new features add to your comfort and convenience.

But the best way for you to experience the thrill of owning a Rebel Sailboat is to test one in the water. Ask us, and discover why Rebel rousing is more fun than sailing.

Rascal

A sleek, superbly manageable 14' sloop — Rascal is your ideal first sailboat. She has a 6' beam and comfortably seats up to four adults. Your family will enjoy Rascal's easy handleability and low maintenance. Conveniences include aft ice box, forward storage compartment, and many quality appointments found on larger sailing craft. Safety features let you handle Rascal with confidence even in hard and heavy surf. And she trailers even behind a sub-compact car.

Rebel

One of the world's best known fiberglass racing boats, the 16' Rebel even enjoys its own National Class Association. Rebel offers you the conveniences of cuddy cabin with large storage area, aft ice box, seating for six, dependable performance as a day cruiser, and a proven design that will deliver years of sailing enjoyment.

Day Sailer I

This is the original Day Sailer I designed for George O'Day. Over 10,000 are now sailing in the U.S., supported by a strong national association. A spirited racer, Day Sailer I also makes an outstanding cruiser for the larger family. It seats six adults comfortably, with cuddy cabin providing ample storage and protection from the elements. Excellent safety features.

Rascal

Rascal Standard Features
