U.S. SABOT

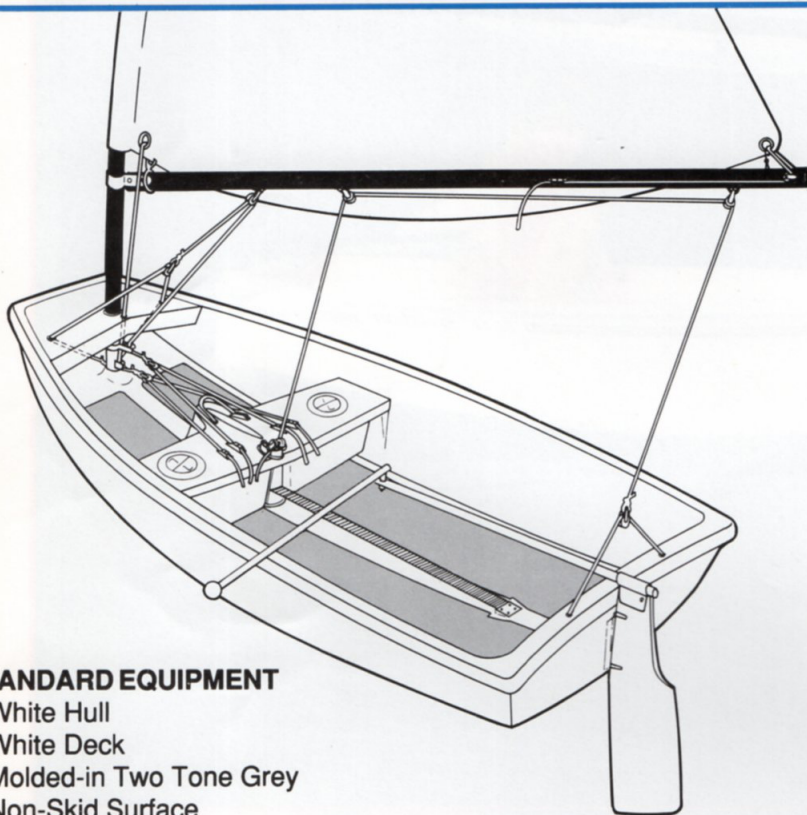

The U.S. Sabot continues the tradition of the thousands of Sabots sailing today as the perfect first boat for the beginning sailor.

Popular with junior sailing programs for its simplicity and safety. Equipped with the racing package, the U.S. Sabot offers all the sail controls of a larger boat, so learning sailors can develop a full range of sail trimming skills.

The U.S. Sabot is built to withstand the tough use of a learning sailor. The hull is made of inner and outer hand-laid-up fiberglass parts for strength and durability with a structural foam core for full flotation. The standard and race rigging feature high quality hardware and fittings. The mast is flexible, tapered fiberglass and the boom is anodized aluminum. The daggerboard and rudder are foam-filled fiberglass.

The U.S. Sabot. America's number one fun boat for sailors of all ages.
