

# *The Clark San Juan 21*

THE SAN JUAN 21 IS A SAFE, INEXPENSIVE, CRUISING-RACING OVERNIGHTER.  
IT WAS DESIGNED BY DON CLARK IN 1969 FOR EASE OF TRAILERING TO  
CHOICE CRUISING AREAS, AND IS QUICKLY RIGGED AND LAUNCHED OFF BEACHES.

# The San Juan 21

The San Juan 21 stores into one complete lockable package. The completely retracting keel, hinged mast and easily removed rudder makes trailering and launching easily done by one man. The boat may be stored at home on its trailer, saving expensive moorage costs. In as few as 15 minutes the mast can be hinged into place, forestay connected, sails bent on, boat launched and sailing. There is no keel raising mechanism to rig and derig or to cause drag as it is completely self contained.

On land the San Juan doubles as a house trailer for overnight campouts.

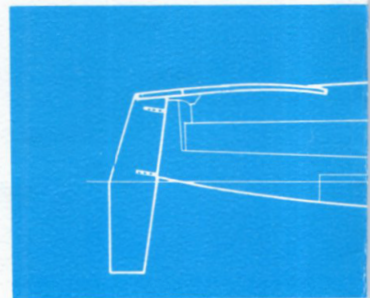

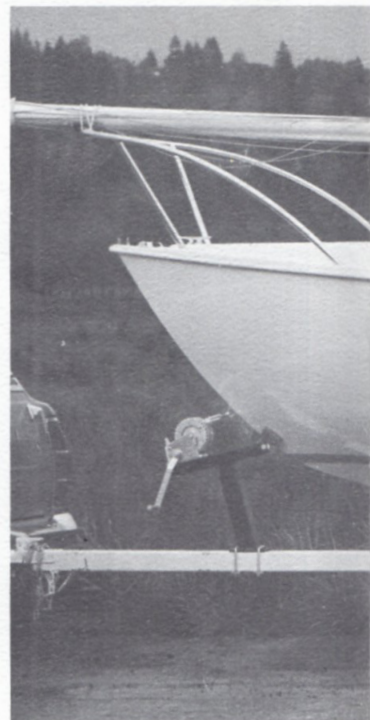

The San Juan 21 is truly a 'Go anywhere' boat. Her large cockpit makes her comfortable for day sailing. Her spacious cabin and large berths allow comfortable accommodations for four adults.

Designed and rigged for sailing in a variety of conditions and waters, the San Juan is equally good for cruising and racing. Her sturdy, constant airfoil, 400 lb. lead keel makes the boat completely self-righting for speed and safety. The lightweight, high-

performance, planing hull with long waterline and flat run makes the boat move very well in light winds and allows fantastic bursts of surfing and planing when the winds freshen.

The San Juan 21's cabin is both spacious and light. A storage hatch is provided under the forward berth and convenient storage is found below the cockpit floor. The interior is fully molded and features full-length and wide berths, molded shelves and counter tops. Provisions are made for installation of sink, head, galley stove, etc. Four large windows, semi-raised deck, teak trim, heavy vinyl cushions and a large sliding hatch make the interior delightful.

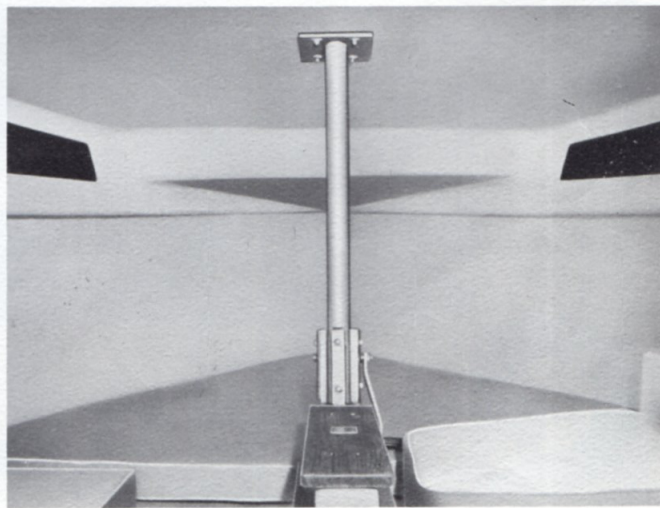

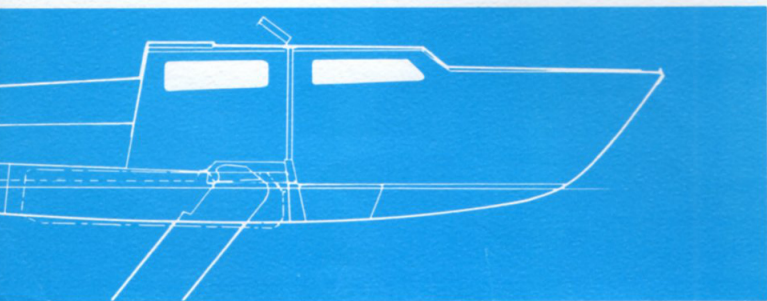

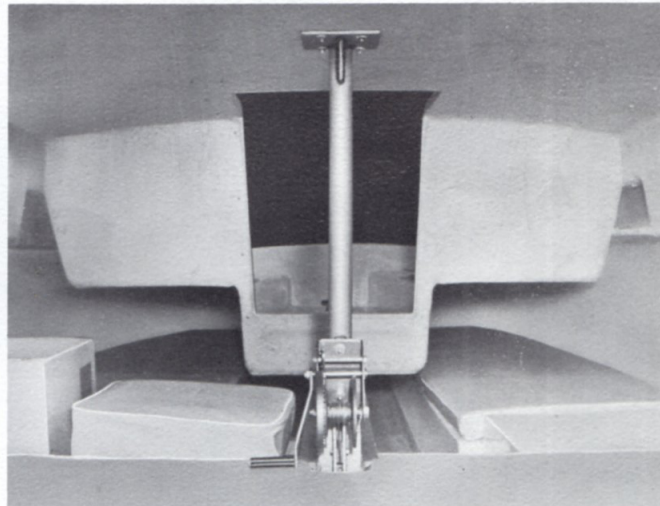

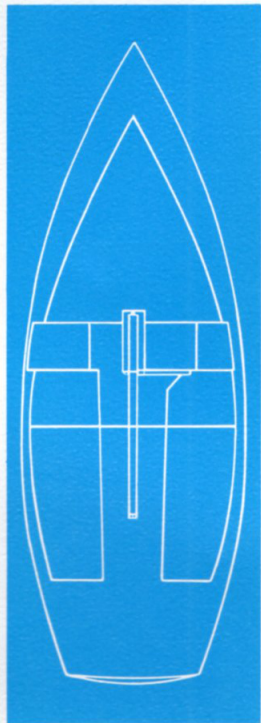

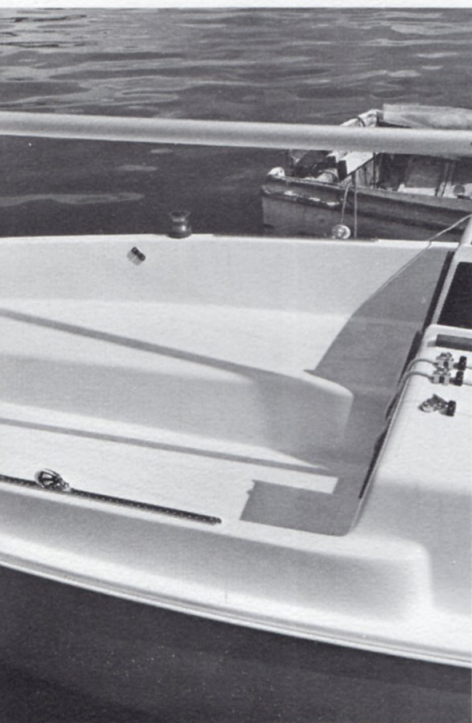

Optional extras are available, all easy to install in your San Juan 21. These are: Genoa jib and gear/with or without winches, marine head, sink, stove, motor mount, hand rails, bow pulpit, running lights and trailer. Truly a short list in comparison to other boats of her class due to the inclusion of many extras as standard equipment.

## special features....
