"8" SAND PIPER"

SANDPIPER -

L.O.A. 8', BEAM 4'2", DRAFT 4"

This 8' rowing and sailing dinghy was designed as a day sailer and yacht tender. The ease of handling, large carrying capacity and its versatility for rowing and sailing are accentuated by the fact that the boat weighs only 53 lbs.

As a sailing dinghy, the "Sandpiper" is a nimble little soul, forgiving with the beginner yet exhilarating in the hands of an experienced sailor. Two different sail rigs are offered with the "Sandpiper"; a 45 sq.ft. Marconi rig or a 52 sq. ft. sprit sail.

As a rowing boat the "Sandpiper" rekindles the pleasures of rowing. The boat has good carrying capacity and rows quickly and easily with or without a load.

For those who might be interested in building their own "Sandpiper" we have kits available, with explicit instructions. The amateur can build a "Sandpiper" in one month, working weekends only.
