## **FAMILY SAILING**

## The Designer Comments:

I wanted to develop a catamaran with outstanding racing performance, and still capable of carrying my whole family for day sailing. Above all I wanted a boat manuverable in the hands of a complete novice. With the aid of the jib the SEA SPRAY tacks as easily as a mono-hull. A new sailor develops confidence immediately.

The design emphasizes lightness, both for ease in transporting and handling out of the water, and for racing performance and manuverability in the water. The hull design was optimized by computer. The boat is rugged. Construction is of maintenance-free fiberglass and corrosion-proof metalwork. Dual flotation tanks and a sealed-tube mast provide unsinkable safety and single handed righting in case of capsizing.

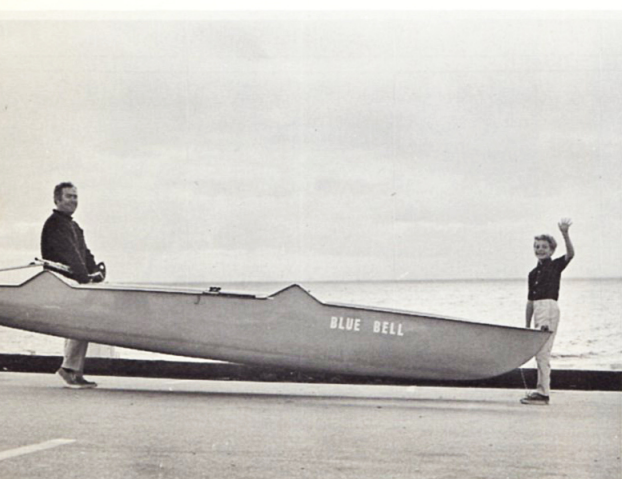

The SEA SPRAY is easy to lift onto a car and can be legally carried on a compact car.

The SEA SPRAY trailer is easy to tow with a sports car.

I continue to use my SEA SPRAY for family fun and to win the big A Class races. You need sail it only once to be convinced that it uniquely achieves the goals I had in mind.

*Allen Arnold*

Even an 8 year old can help you carry your SEA SPRAY

## NOTE THESE UNIQUE SEA SPRAY FEATURES

- **VERY LIGHTWEIGHT:** 150 lbs. for high performance in the water and easy handling out of the water.
- **INEXPENSIVE.**
- **STRONG AND MAINTENANCE FREE:** Built of fiberglass and anodized aluminum. The design, materials, and workmanship permit Gen-Mar, Inc. to give a two year guarantee on hulls for normal use.
- **COMPACT:** Can be transported assembled on top of a car and is readily trailerable.
- **EASY TO DISASSEMBLE:** Can be taken apart for storage in a space approx. 2' x 2' x 19'.
- **TWO STYLES AVAILABLE:** (1) The regular SEA SPRAY with a sleeve sail, which is especially convenient when the catamaran is regularly transported, and (2) the SEA SPRAY 70 with a Halyard Sail and Semi-Wing Mast when the mast is to be left up and the boat left in the water.
- **A PROVEN CLASS A WINNER:** With a Portsmouth Rating of 80.
- **A SIMPLE-TO-OPERATE BOAT:** For family fun.
- **A RAPIDLY EXPANDING CLASS:** In the U. S. and Canada you will find stiff competition. Each SEA SPRAY is accompanied by an Official Class Certificate.
- **EASY TO SAIL:** The jib facilitates tacking.
- **SAFE:** Sufficient buoyancy in the hulls to carry 4 people. Even with both hulls filled with water, 300 lbs. of flotation remain. (Sometimes people forget to screw in the drain plugs.)

- **FAST:** Speeds of 17 k have been reached on flat water, and even higher speeds are attainable in special surfing conditions.
- **SHALLOW DRAFT WITH TIP-UP RUDDERS:** With the easy-adjust dagger boards raised, draft is only 6".
- **EASILY RIGHTED:** The SEA SPRAY can be righted by one person without any special equipment or lines, even under the most adverse conditions: i.e. heavy seas, high winds, boat completely upside down.

## STANDARD EQUIPMENT

Dacron mainsail and jib, with battens  
 Kickup rudders  
 Daggerboards  
 3/8" braided Dacron main and jib sheets  
 Adjustable jib cleats  
 Main sheet jam cleat  
 Boom vang  
 Adjustable outhaul  
 Stainless steel blocks  
 Full width tiller extension  
 Hiking straps  
 Stainless steel rigging  
 Anodized aluminum spars and crossbeams  
 All castings black anodized  
 Non-skid decks  
 A choice of colors

## SPECIFICATIONS

Length .....15'  
 Beam .....6'5"  
 Sails (Dacron)  
     Main .....95 sq. ft.  
     Jib .....30 sq. ft.  
 Mast Height .....20'  
 Weight  
     Fully rigged .....150 lbs.  
     Hulls assembled .....110 lbs.  
 Maximum load capacity .....1200 lbs.  
 Positive Flotation .....300 lbs.  
 Trampoline .....Vinyl coated nylon  
 Hulls .....Fiberglass  
 Kick up rudders and dagger boards .....Fiberglass  
 Aluminum parts .....Anodized
