## BIG BOAT FEEL

The 8 foot beam provides incredible stability at the dock, as well as at sea. This characteristic is appreciated when holding the boat down in a sea breeze. Passengers sit deep in the cockpit creating the secure feeling of being "in" the boat rather than "on" it.

## HANDLING and PERFORMANCE

The optional carbon fiber mast at 32' 6" AWL and the 190 square feet of sail provides outstanding performance even for a novice sailor. With only the tiller and mainsheet to operate the mast is self rotating to provide picture perfect sail under any wind condition, with no luff eddy pocket. This high performance, single sail operation is simplicity at its finest.

**SEAWARD**

## ACCOMMODATIONS

Large cabin - visually open and spacious - "Transforms" from underway configuration with comfortable passenger seat, to galley and cooking layout. Includes functional stove sink, cup and plate rack.

Queen size V - berth sleeps 4 adults. A 5 gallon fresh water tote and head are also included.

## SAFETY

The Seaward Fox is underlined with high density closed cell foam flotation.
