

Seawolf 33

33'

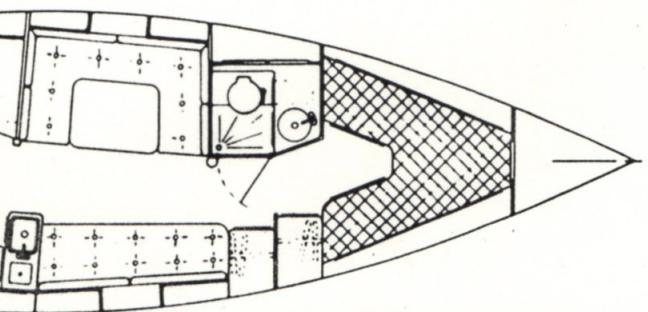

Strong and comfortable with accessibility, built to standards not seen in recent years, conservative, trouble-free and built to stay that way: That's what makes a great cruising boat.

Compare construction: a one-piece, hand laid-up, solid fiberglass hull with internal lead ballast bonded in place with fiberglass and gelcoated; a unique external hull to deck joint, chemically bonded with stainless steel bolts every four inches; stanchions and mooring cleats through-bolted to the external hull joint; a complete head and hull liner to prevent condensation and maintain comfortable temperature belowdecks.

The teak-trimmed interior is sensibly laid out for usability and comfort. Headroom of 6'5", expected only in 40'-plus yachts, gives an open, homey feeling. Below are six berths, two hanging lockers, and a completely private forward cabin. A full dinette,

chart table, complete galley with gimbaled stove and oven, big icechest, and deep, big sink make cruising a joy. Whether you're crossing an ocean or gunkholing, a 4-foot draft with a 49 percent ballast-to-displacement ratio ensures a stiff, comfortable yacht with access to shallow waters.

Standard features include Bariant self-tailing, two-speed winches, an FWC Yanmar 27 horsepower diesel, Edson pedestal steering, main and lapper, 10 Bomar aluminum opening ports with screens and hatches, 12- and 110-volt system including pressure water and shower, Isomat spars, and teak and holly sole with hand-varnished interior. Light-gray hull and nonskid with colored sheer and boot stripes greatly enhance the overall appearance of this spacious yacht. When you compare Watkins to the others, you will find the meaning of true value.
