

**Have all the fun of sailing with none of the cares.
The Sunflower. \$249**

The Sunflower. \$249*

1.913

The Sunflower is for people who want to spend all the time they have for sailing, just sailing. And no time at all on maintenance and repairs.

For \$249 she's yours, ready to sail. But the Sunflower is more than just a bargain. Foot for foot she's the toughest little sailboat made. Her sit-in hull is made of Corlite, a material that's actually tougher than fiberglass.

She's also light. Her hull weighs only 40 pounds. You can easily

carry or car-top the Sunflower any place there's water. Stow your gear under her splash deck, hoist the sail and you're off. Then you can carry her back home and store her in your garage, basement or attic.

Of course the Sunflower is more than just a beautiful, practical and almost indestructible sailboat. She's also a fine nautical design that's been rigorously and thoroughly tested, and a recognized class boat that's a breeze to sail.
