

**For \$199**

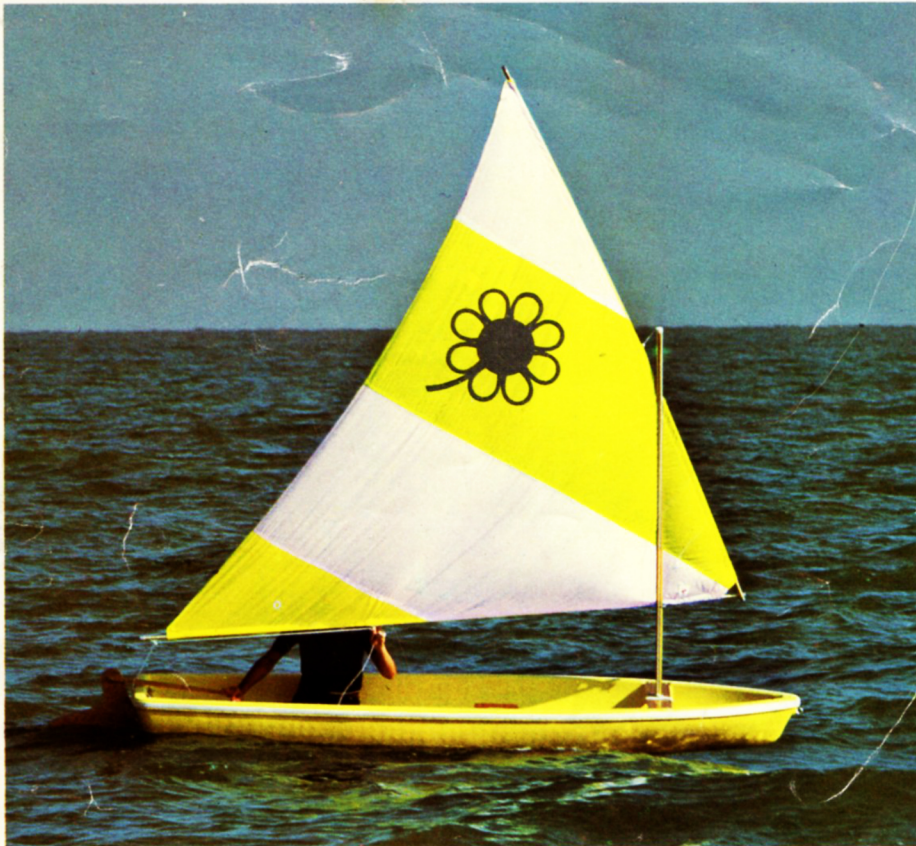

**You can have all the fun of sailing,  
with none of the cares.**

**The Sunflower.**

# The Sunflower. \$199\*

The Sunflower™ is for people who want to spend all the time they have for sailing, just sailing. And no time at all on maintenance and repairs.

For \$199 she's yours, ready to sail. But the Sunflower is more than just a bargain. Foot for foot she's the toughest little sailboat made.

Her sit-in hull is made of Corlite™, a brand-new material (made by a new manufacturing method) that's actually tougher than fiberglass.

She's also light. Only 60 pounds. You can easily carry or car-top the Sunflower any place there's water. Hoist the sail and you're off almost as fast as you can say "Sunflower." Then you can carry her back home and store her in your garage, basement or attic.

Of course the Sunflower is more than just a beautiful, practical and almost indestructible sailboat. She's also a fine nautical design that's been rigorously and thoroughly tested, and a recognized class boat that's a breeze to sail.
