

Telescoping crossbeams - you can take your 12 foot wide Super Cat on a normal 8 foot wide car trailer using our telescoping crossbeams. Set-up time is super quick. Pull the crossbeams apart to 12 feet then raise the mast, and you're ready to sail.

Your family can have lots of fun in the Super Cat with the large (9 foot x 10 foot) trampoline. The high stability built into the boat makes high-speed sailing a breeze.

The unique righting feature allows two people to safely right the boat.

Take your Super Cat camping and pack your tent in a special on-board storage compartment and you've got a vacation beyond your wildest dreams.

A black and white photograph of a large sailboat, likely a trimaran, sailing on the water. The boat has a prominent white sail with the letter 'F' on it. The water is depicted with small, white, wavy lines. To the left of the boat, the words "Super Cat" are written in a large, stylized, cursive font, oriented vertically.

The

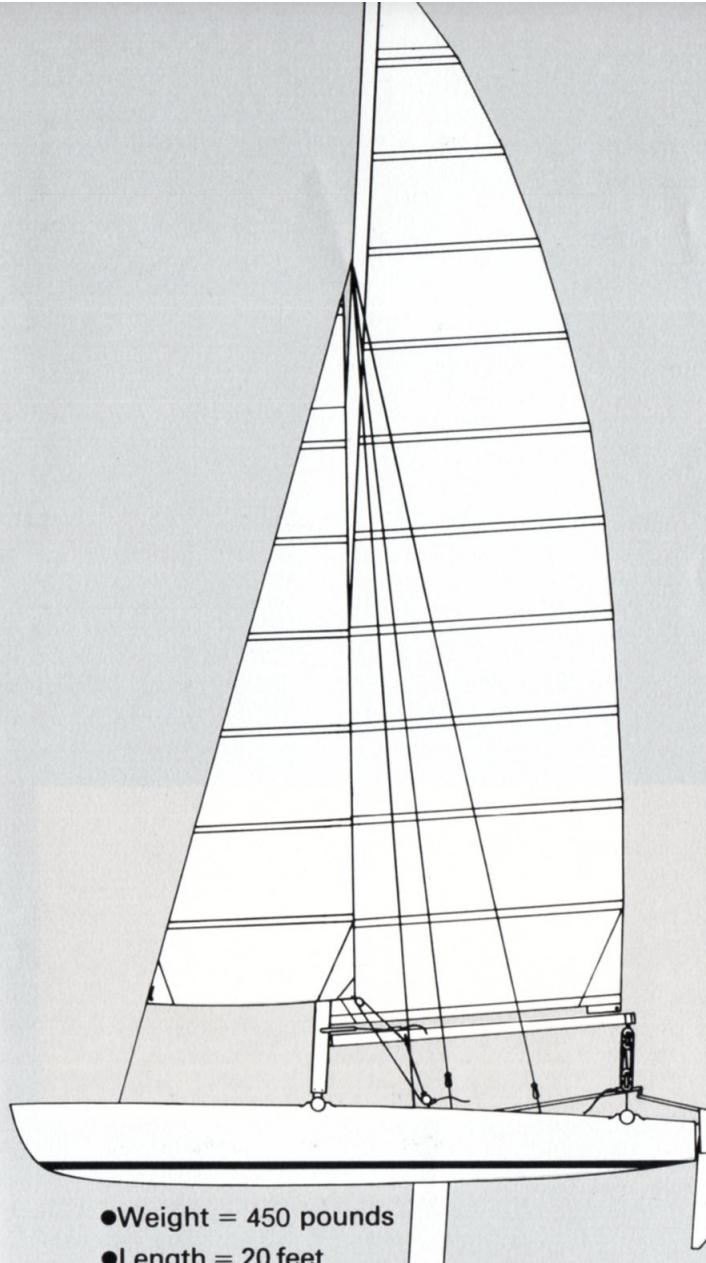

Super Cat

Sail like you've never sailed before in the exciting new Formulae Super Cat, the aerodynamically-designed catamaran.

The light weight, high-strength construction of the Super Cat is the result of superior hull design and space-age materials in the hull lay-up. The elliptical construction provides inherent stiffness to the hull and a more efficient hydrodynamic shape. Positive foam floatation makes the boat unsinkable.

The hulls, rudders, daggerboards and sail plan have been optimized and shaped through mathematical modeling to be the most hydrodynamically-bred aerodynamically-efficient possible. The rudders are designed to be stall and ventilation free.

- Weight = 450 pounds
- Length = 20 feet
- Width = 12 feet (8 feet on trailer)
- Mast height = 32 feet 11 inches
- Sail area = 275 square feet including spar
- Draft = Boards down 3 feet 6 inches
Boards up 6 inches

The "Super Cat"

is a high quality, fast catamaran.

Wow is the

Super Cat

fast!

Super Cat is rated the world's Fastest Production Catamaran it excels in every category that makes a sailboat fast:

- High sail area to weight ratio!
- High righting moment to sail area ratio!
- High fineness ratio hulls!
- Stiff construction!

All of these features provide an excellent boat for high-speed racing and what a racing machine it is! You have your choice of racing with the main and jib as a two-man boat or take the jib off and race as a one-man boat.

Two boats in one and class racing is provided for both.
