

**Sail your own trimaran without going overboard.
The Triumph. \$389**

The Triumph. \$389*

You can't buy any more boat for \$389 than the Triumph because she's really three boats for the price of one.

She's a swift little trimaran that's perfectly safe for the whole family. In fact, she's the most stable boat of her size that you can buy. And she's unsinkable because of full flotation in each of her three hulls. Plus her design makes the Triumph sailor-proof (you can't make a really serious mistake handling her).

And when you're not racing or sailing, her wide deck is great for sunbathing, swimming, and diving.

Her outboard motor well makes the Triumph practical for fishing. Or for plain motoring fun.

You can car-top your Triumph anywhere. Her high impact plastic hulls never ask you to give up a minute of your sailing time for maintenance. So you're never fixing and you're always sailing.

The Triumph is ready to sail for only \$389.
