

THE ULTIMATE...ONE DESIGN!

FAST AND "SAILOR FRIENDLY"

'Jump aboard!'... this trailerable 20 footer that can be sailed with a variety of crew and sailing conditions. 'Say hello!'...to a great "Club Racer" with plenty of performance and stability that can dual as the weekend 'Family Fun Boat'. From Newport, Rhode Island to the coastal waters of Monterey Bay, our prototype logged countless hours sailing with all age and ability levels ranging from novice to pro.

SAILORS...

deserve the best in performance on or off the race course. Whether your racing includes PHRF or One-Design, the weekend fun regatta with family and friends, or just the casual Wednesday night series, the Ultimate 20 will keep you in front of the pack.

ULTIMATE STABILITY...

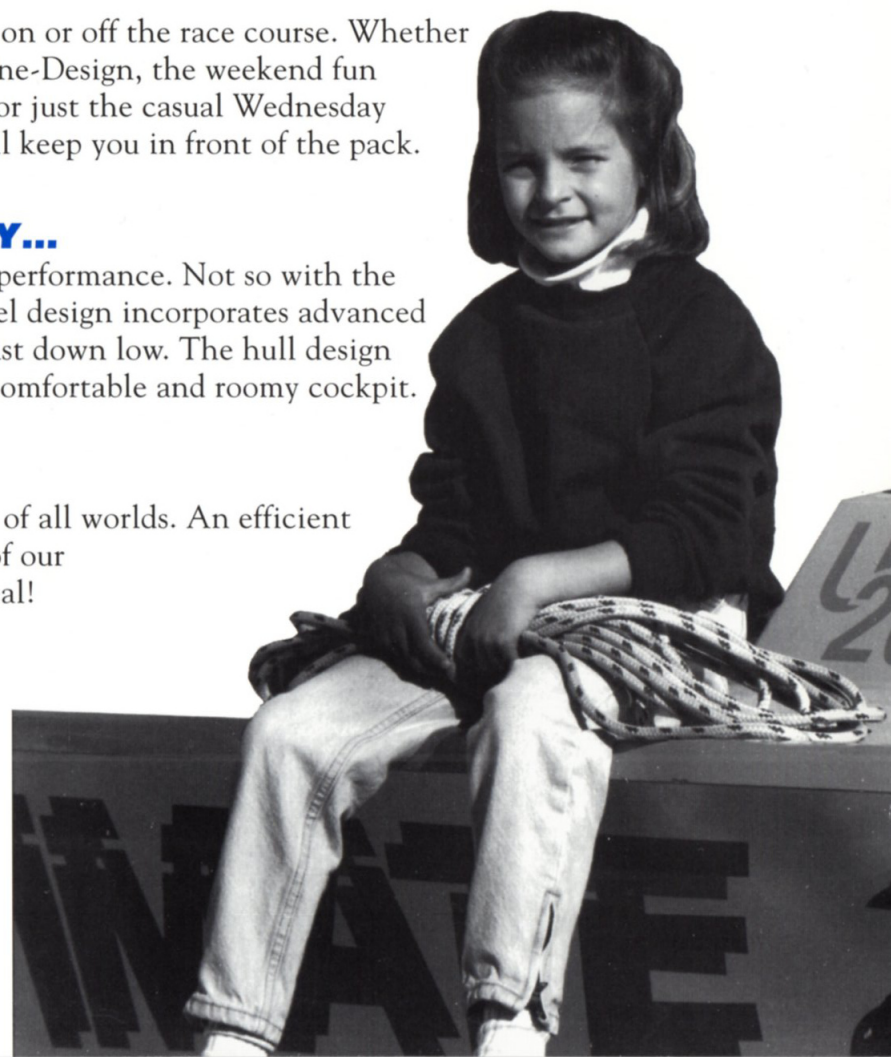

usually comes at the expense of performance. Not so with the Ultimate 20. The retractable keel design incorporates advanced foil technology placing the ballast down low. The hull design and maximum width provide a comfortable and roomy cockpit.

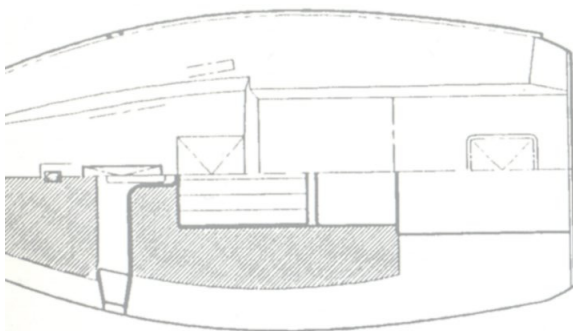

ULTIMATE SAIL PLAN...

designed to be rigged and down-rigged in 30 minutes, this sail plan features the best of all worlds. An efficient roller furling jib, fully battened mainsail and asymmetrical spinnaker are all part of our FUN DESIGN_{sm} philosophy. The single handed sailor will find any condition ideal!

ULTIMATE EFFICIENCY...

The increased popularity of small engines in cars, light trucks and vans, is an important consideration when designing a boat. With a combined boat and trailer weight of less than 1500 pounds, this boat is not only an ultimate trailerable, it's 'Vehicle Efficient'!

ULTIMATE DESIGN TEAM

JIM ANTRIM, a highly acclaimed Naval Architect headed our team by answering all the questions that we could throw at him. Jim took our prototype platform and designed the hull, keel, foil, deck and interior. Jim is an active sailor and was a member of the successful design team on the

America's Cup defense. Accountable for the composite engineering, Jim was one of the four engineers responsible for the overall structural design in America³.

ULTIMATE QUALITY

MOORE SAILBOATS – The Ultimate 20 is built under strict One-Design production standards by the world class boat builder Ron Moore. Ron's an early pioneer of ULDB's. His 'Moore System' is the result of 26 plus years in boat building that includes the popular Moore 24. Ron's hands-on commitment is rare to custom boat builders.

ULTIMATE CONTROL

JAY GLASER was our man aloft. We turned to Jay to design a sail plan that was efficient and easy to control. Jay knew we wanted performance and power that would please the professional yet simple enough for sailors of any age or experience. His background and dedication to the sport is unmatched. Jay's achievements on small boats and catamarans are underscored by his Tornado World Championship and Olympic Silver Medal.

ULTIMATE SAILBOATS INTERNATIONAL

The man at the helm of U.S.I. is two-time Hobie World Champion **JEFF CANEPA**. After years of sailing small boats, catamarans and sailboards, Jeff's vision was to produce a simple yet exciting 20-footer with catamaran-like performance both FAST and FRIENDLY.

"On the wind the...full-batten mainsail gives you all the power you need, and there's no mistaking when the boat is in the groove ...there's great sailing on either side of that line."

SAIL, 1994

DESIGN ONBOARD SAFETY...

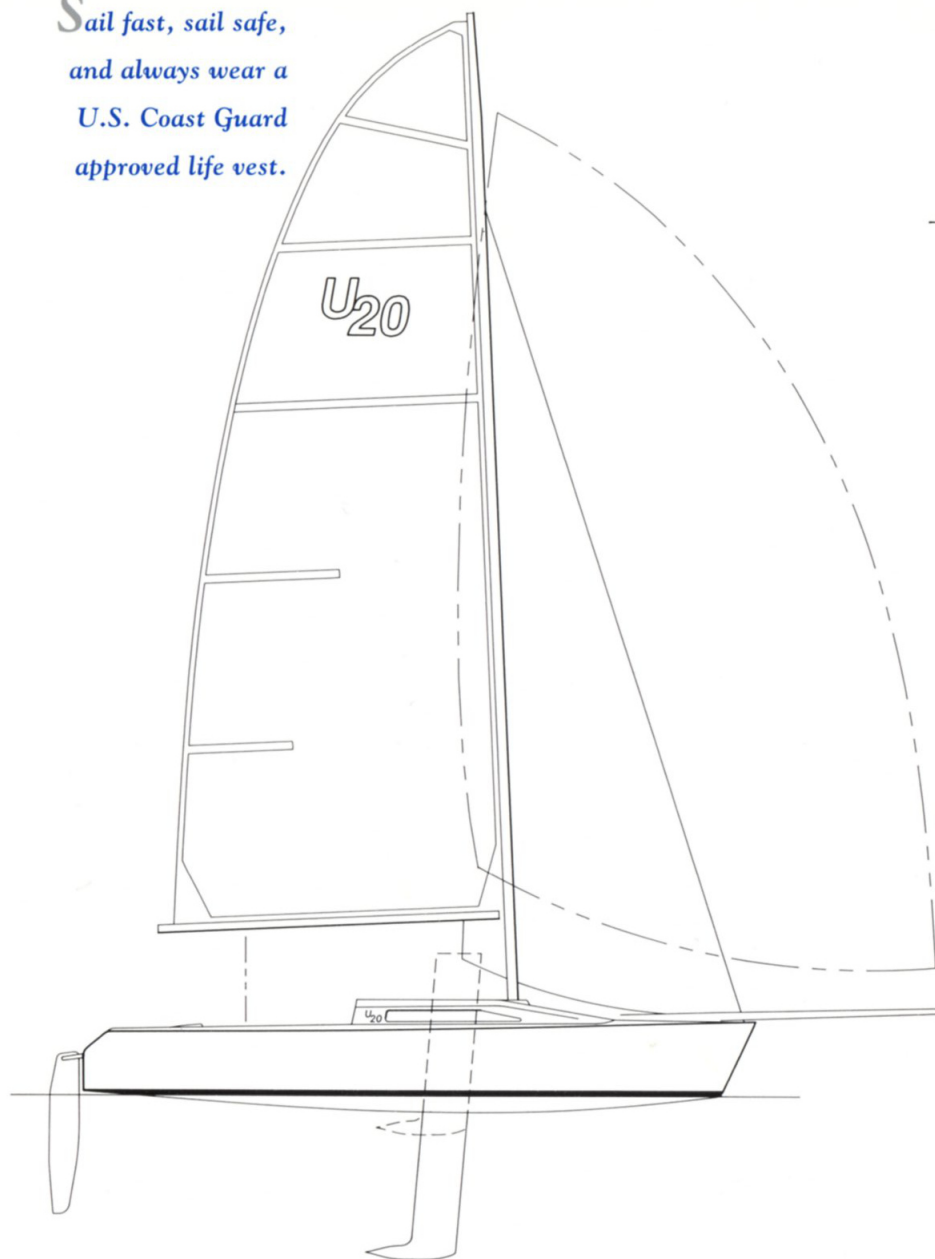

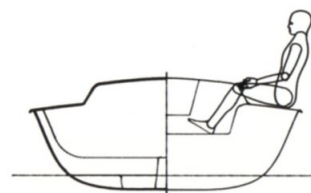

an integral part of every Ultimate 20. D.O.S. includes features like positive flotation and a vented outboard motor locker, which keeps fumes out of the cabin and can dual as a storage compartment.

CABIN FORWARD DESIGN...

makes this 20 footer an ideal weekend camper. The forward V-berth is perfect for short overnight trips and provides shelter from the rain. The concealed storage area under the cockpit, can be used for a self contained head.

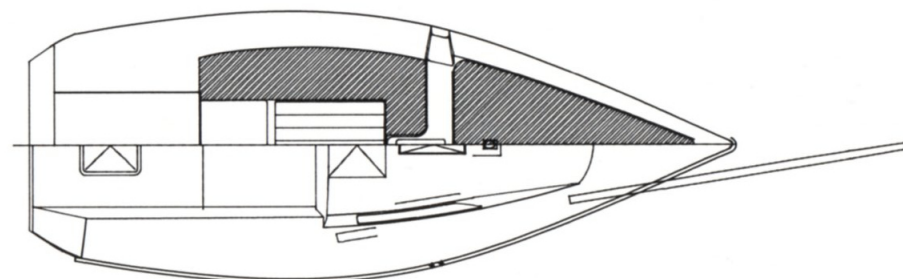

Sail fast, sail safe,
and always wear a
U.S. Coast Guard
approved life vest.

DIMENSIONS

L.O.A.	20.95 ft.	6.39 m
L.W.L.	18 ft.	5.48 m
Draft (keel down)	5.03 ft.	1.53 m
Draft (keel up)	.75 ft.	.23 m
Displacement	1100 lbs.	500 Kg
Mainsail	205.8 ft. ²	19.13 m ²
Jib	100 ft. ²	9.29 m ²
Class Spinnaker	452 ft. ²	41.09 m ²
