

X-372

36'

X-Yachts has always proven what we claim about the performance of our yachts. X-Yachts frequently participate in the hardest races in the world where speed, performance, and seaworthiness are tried under the most extreme conditions. Considering the results from 1985, and especially 1986, any potential customer for X-372 has the right to have high expectations. The latest major victory for an X-Yacht was winning the #1 and #4 spots in the 1986 One-Ton Cup with the X-1 Tons *Andelstanken* and *Seaway*.

With the experiences from X-1 Ton and the production of 1,100 yachts, X-Yachts has now developed a new 37-foot racer/cruiser for the quality conscious customer. This yacht is of a size X-Yachts has never had before, being between our X-102 and X-402. The yacht provides a spacious, stable, and fast-sailing cruiser/racer with accommodations for five to six people and with all comforts on board.

Standard equipment is an over-dimensioned 28-h.p. 3 cylinder Volvo diesel engine with folding propeller, easily operated rigging with furling forestay, roller-furling genoa and mainsail, hot and cold pressure water system, central bilge with pump, shower in head compartment, propane stove with oven, double stainless steel sink and icebox with electric-refrigeration, teak in cockpit, well-dimensioned self-tailing winches,

mahogany interior of high quality, and very carefully selected deck fittings.

The know-how X-Yachts has is expressed in all the details on the X-372. This ensures the very best performance without losing any qualities as a luxury family cruiser. All X-yachts are built in hand laid-up sandwich construction and with all the heaviest components—such as batteries, engine, and tanks—centrally installed to insure comfortable motion in the seaway. Also available in a sport version with fractional rig and racing sails.
