

*Add a Zuma to Your Life.*  
***And Live.***

**zuma®**

Imagine feeling the waves off the bow, the spray on your body, the wind in your hair, and the sun in your face. The thoughts are invigorating. Maybe it's a calm sunset sail with your kids or mate, a lazy day sailing off the beach, or a raging ride in a big breeze. The possibilities for fun are limited only by your imagination.

The ZUMA makes sailing easy. From its inception, the ZUMA was designed without compromise for the function and comfort of recreational sailors. You will enjoy a nearly seven foot long cockpit with comfy rolled seat tanks. Two can sail comfortably together, and the deck fittings are flush, so that you can sunbathe in

comfort, avoid stubbed toes, and slide the ZUMA on top of the car without it getting snagged on fittings.

Despite its racy appearance, the ZUMA is the easiest and most forgiving small sailboat afloat. Its hard chines and low aspect sailplan combine to make a stable and safe performer that anyone can enjoy. High quality construction, and smart design make the ZUMA virtually maintenance free, and besides... it's fun.

Add a ZUMA to your life. And live.
